I am a Web Developer & Designer. My objective is to further evolve an learn by working with experts in my field in a team setting. I graduated from Seneca College, where I learned building responsive, user-centric, web applications using HTML5, CSS, SASS, JavaScript, jQuery and React. In addition, I am also skilled in UI/UX design, graphic design, game design.

Education

- **2019 - Diploma in Interactive Media Design**
  Seneca College, Toronto.
  GPA: 3.6 out of 4.
  Relevant courses: Web Development, UI/UX Design, Graphic Design, Game Design, Interactive Media Business, Project Management.

- **2018 - Web Development Certification**
  Aptech Computer Education, India

Experience

- **July 2020 - Present**
  Front-end web developer (Contract)
  Thought Cafe - A Media company, Toronto.
  - I am working on their project "Nova Exoplanets" - a web-based 3D educational games about solar system for kids.
  - I work with 3D artists and business to create interactive web components using React and Babylon.
  - My responsibilities also include bridging a gap between 3D artists and development team by integrating and testing the 3D models in our codebase.
  - Technologies used: React.js, Babylon.js, Blender and Adobe Photoshop.

- **July 2020 - Present**
  Web developer & designer (Freelance)
  The Bar Essential - A Startup company, Toronto.
  - I designed and developed their e-commerce website.
    https://thebaressential.ca/
  - Technologies used: WordPress, Adobe Illustrator and Adobe Premiere.

- **August 2019 - November 2019**
  Front-end web developer (Internship)
  Intelense Inc - A technology company, Toronto.
  - I worked on the web module of their flagship project which uses artificial intelligence video analytics to provide an actionable alert to people monitoring surveillance cameras.
  - I designed and developed their marketing website.
    https://intelense-website.herokuapp.com/
  - Technologies used: HTML5, CSS, Bootstrap, React.js, and Electron.js.
